

ICMSE2018 table of content

Preface of ICMSE 2018

Committees of ICMSE2018

Keynote Speakers of ICMSE2018

Peer review statement

Chapter 1: Nano-scale and Amorphous Materials

Preparation and characterization of nanoscale flaky iron phosphate
from phosphating slag 1
Xianzhen Song, Ying Cao, Yi Zhang, Fangjing Sun, Xixi Yan,
Xiaoyu Liu, Lijun Wang

Dynamic characterization of cellulose nanofibrils 6
Zhe Yuan, Jinsong Zeng, Kefu Chen

The effect on the morphology of mesoporous silica nanoparticles
modified with different functional groups 11
Youyun Wang, Yu Wang, Wanxia Wang, Mingxing Liu

Synthesis and characterization of carboxyl modified mesoporous
silica nanoparticles with disulfide bond as a cross linker 16
Youyun Wang, Wanxia Wang, Yu Wang, Mingxing Liu

Chapter 2: Functional and Structural Materials

Evaluating the performance of a water-cooled scooter engine
through a 3-D numerical and experimental analysis 21
Hao-Pin Lien, Jiin-Yuh Jang, Por-Kang Chen

Synthesis and properties of two kinds of alkyl containing
benzoxazine 28
Mingcheng Cai, Qiaolong Yuan, Farong Huang, Chengcheng
Wang, Qian Xu, Fengke Du

Study on novel silicon-containing dipropargyl ethers 34
Sikun Dong, Qiaolong Yuan, Qian Xu, Farong Huang

Experiments on interface properties for interpenetrating network
composites 40
Ning Fan, Yang Bai, Hongtang Chen, Peiquan Guo, Xiuli Fu

Hot deformation behavior and microstructure evolution of Ti ₂ AlNb-based alloy in α_2 +B2 phase region	44
Feng Zhou, Kelu Wang, Xin Li, Xuhuai Chen, Peng Wan	
Hot deformation behavior and Zener-Hollomon parameter constitutive model of Ti-22Al-26Nb-2Ta-0.5Y alloy	50
Xuhuai Chen, Kulu Wang, Xin Li, Feng Zhou, Peng Wan	
Stability analysis of synchronous construction of towers and beams of cable-stayed bridge	55
Zeying Yang, Minghao Sun, Yangyudong Liu, Yongye Qu, Yalei Zhang, Xinnan Xie	
Parametric analysis on mechanical performance of prestressed CFRP reinforced concrete bridge deck	63
Zeying Yang, Yangyudong Liu, Minghao Sun, Yongye Qu, Xiexin Nan, Yalei Zhang	
Study on construction control technology for tower and beam synchronous construction of cable-stayed bridge	68
Zeying Yang, Yongye Qu, Yangyudong Liu, Minghao Sun, Xiexin Nan, Yalei Zhang	
Study on thermodynamic properties of polyurethane fibers under small strain	76
Gexin You, Xinsen Liu, Wenchao Wang, Jinkai Chen, Xiuwen Zhou	
Effect of slag powder on strength development of alkali-activated recycled cement	83
Chenhui Zhu, Yongfan Gong, Yonghao Fang	
Surface modification of cellulose nanofibers and their effects on the morphology and properties of polysulfone membranes	88
Wentao Zhang, Lili Zhong, Tianhao Wang, Zeming Jiang, Xing Gao, Liping Zhang	
Synthesis and self-assembly of stearic acid-poly (ethylene glycol) block copolymer	97
Xizhi Lv, Yan Zhang, Yujian Liu	
Reinforcement of Silicon-Containing Arylacetylene/ Quarts Fiber composites by poly (imide-co-siloxane) macromolecular coupling agent	103
Lingao Ru, Yanhong Hu, Yuanbo Gu, Fangfang Zhang, Bin Cheng, Yan Zhou, Shifeng Deng	

Residual stress measurement of Sic fiber /YSZ composite thermal barrier coating by micro-Raman spectroscopy	111
Rongbin Ma, Ziyi Tan, Genglei Kang	
Synthesis and characterization of silicon-containing arylacetylene ether of bisphenol a resins and their composites	117
Jiadong Zheng, Qiaolong Yuan, Fangxu Cui, Farong Huang	
Synthesis and application of a novel dicyanide-containing silane coupling agent	124
Bin Cheng, Yanhong Hu, Shifeng Deng, Fangxu Cui, Junjie Hu	
Homopolymerization of methyl methacrylate by Ni(II)(salophen) Complex	131
Dongya Li, Danfeng Zhang	
Underwater docking installation technology of submerged floating tunnels	134
Mansheng Dong, Fei Tang, YuanZhang, Hao Ding	
Impulsive coupling characteristics of materials irradiated by electron beam	140
Peng Lin	
Microstructure and mechanical properties of TiBw/Ti-Ti ₃ Al metal-intermetallic laminate (MIL) composites	144
Shaohua Qin, Lin Geng, Xiping Cui, Jie Zhang	
Preparation and performance optimization of intermediate temperature cathode-supported SOFC	152
Lian Peng, Xingqing Yan, Hongxin You	
Research on assessment method of cascading hazard to substation by earthquake damage	158
Rushan Liu, Rongxing Shu, Meijing Zhang	
Impact test of composite sandwich beam with built-in FBG sensor	169
Haiping Pei, Yingying Wei, Yongzhen Chen, Li Wan, Weiqing Liu	
Analysis on mechanical property of tensile bolt-ball joint with sealing plate in high temperature	179
Dandan Pan, Bingsheng Huang	
Cyclic loading test for precast concrete composite shear walls	184
Yubin Sheng, Zijun Wang, Yu Wang, Handong Yang	

Study on immobilization of papain with magnetic porous alginate microspheres	196
Hui Wang, Dongxu Shao	
Analysis of dynamic response of steel reinforced concrete bridge piers under impact	202
Wei Jiang, Nan Zhang, Jiequan Li, Min Gao, Jiajia Chen, Xiaoxiao Sha	
Analysis of influence factors of P- Δ effect considering vertical ground motion	209
Juan Zou, Hongjing Li, Guangjun Sun	
Experimental study on seismic performance of Song-style Dou-gong joints in Chinese traditional building	215
Bo Shen, Xiaowu Cheng, Weidong Lu, Weiqing Liu	
Analysis of seismic collapse mechanism of concrete frame structures subjected to near-fault ground motions	219
Kaiya Bian, Guangjun Sun, Hongjing Li	
Study on characteristic parameters of near-fault response spectrum	227
Jiale Li, Hongjing Li, Guangjun Sun	
The effect of non-zero initial displacement value on displacement jump and wave form based on the cubic nonlinear spring interface model	233
Xiqiang Liu, Li Wang, Guidong Chen, Gui Zhang	
A research on the shear capacity of column pier embedded steel tube	239
Yeshuang Wu, Nan Zhang, Jiequan Li, Min Gao, Jiajia Chen, Xiaoxiao Sha	
Experimental study on a new type of bucklingrestrained braces wrapped by GFRP	245
Jie Zhang, Yang Peng, Jun Dong	
Fiber hinge approach for nonlinear analysis of structural members accounting for local buckling under large deformation	252
Yuhua Wang, Yang Peng, Jun Dong	
Numerical simulation of curved bridge subjected to earthquake induced pounding	258
Zhipeng Wang, Guangjun Sun, Hongjing Li	

Analysis of the stability bearing capacity of biaxial bending cellular steel column with circular hole	264
Danbin Qian, Tingyin Zheng	
Cutting performance of CrAlSiN- coated router on the PCB board	272
Weiche Huang, Chenghsun Hsu, Tingjou Ding, Weiyu Ho	
Dynamic characteristics of a periodically forced periodic system with a clearance in low frequency vibration	277
Yuqing Shi, Sanshan Du, Xifeng Zhu, Fengwei Yin, Guanwei Luo	
Characteristic analysis of a quasi-zero-stiffness vibration isolator	285
Jiacheng Zhou, Xiaoming Wang, Yulin Mei	
Experimental study on residual stress of milling medical magnesium alloy	295
Yang Qiao, Peiquan Guo, Shouren Wang, Xuefeng Yang	
Fitting method of rotating paraboloid reflector	301
Zhouyang Li, Zhuo Xie, Jing Wang, Yanni Lei	
Finite element analysis on mechanical properties of 120 billet tension leveler	308
Jialian Shi, Hehe Ding, Xu Wang, Zhiqiang Kang	
Kinematics analysis, design, and simulation of a dual-arm robot for upper limb physiotherapy	314
Siqi Cai, Guowei Huang, Ledeng Huang, Longhan Xie	
Investigations on formation mechanisms of out-of-round wheel and its influences on the vehicle system	321
Wei Shan, Ye Song	
Mechanical model of yaw damper and its application in the simulation of vehicle system dynamics	331
Li Huang, Jing Zeng, Xiaozhi Zhou, Ye Song	
Study on the single process parameter in the cutting force of C/SiC composites by ultrasonic vibration method	339
Yan Liu, Xiaorong Jiang, Fang Yan , Shiyu Jiang, Jingzhen Zhen	
Comparison of Ag and Zr with same atomic ratio in Cu-Cr alloy	346
Xue Feng, Haofeng Xie, Zongwu Li, Xujun Mi, Guojie Huang, Lijun Peng, Zhen Yang, Xiangqian Yin	

Chapter 3: Electronic, Optic and Magnetic Materials

Effect of large size graphite on dry friction and wear characteristics of copper-based brake friction lining materials	350
Jiazhi Yuan, Jing Zeng, Zhenxin Duan, Wen Pei, Hua Chen	
The preparation and the photoelectric characteristics of graphene/MoSe ₂ heterojunction	356
Cheng Xu, Tao Peng, Mingyan Guan, Qiang Zhang, Xiyong Ma	
Light transfer characteristics of MoS ₂ /metal one-dimensional photonic crystals	362
Xiyong Ma, Xin Ding, Hongmin Mao	
Study on the performance of alumina, zirconia and molybdenum composite insulation system for sapphire single crystal furnace	367
Jianpang Zhai, Jianwei Jiang, Kaige Liu, Shuangchen Ruan	
Interfacial properties of Hg ₂ CuTi-type Heusler alloy Ti ₂ NiAl/GaAs(100) heterojunction	374
Yuanqiang Zhang, Lu Yang, Xiude Yang	
Theoretical and experimental analysis of photovoltaic-electrostatic driving flexible cantilever beam	380
Yusong Chen, Xinjie Wang, KunQiao, Yafeng Liu	
Stability for a kind of networked control systems with time delays and uncertainties	388
Yinhuang Li	
Non-magnetic drill collar failure analysis and prevention measures	395
Yanshu Liu, Zheng Sun	
Dynamic mechanical property analysis of 3D membrane-imbedded acoustic metamaterials	401
Yingxing Feng, Xiaoming Wang, Yulin Mei	
Fatigue reliability analysis of mechanical components for airflow control in pneumatic solenoid valve	412
T. Y. Kam	
Design and implementation of a PMSM servo drive system applied to intelligent patrol robots	419
Yao Meng, Xiangzhong Meng	
Study on springback behavior of carbon steel during single-point dieless forming based on neural network method	427
Ji Zhang, Feifei Zhang, Jianbin Ruan, Kai He	

Design of a distributed synthetic instrument test equipment based on FPGA	434
Shichun Chen, Bo Yang, Lei Lei, Wei Peng	
User experience design and its application in mobile phone design	440
Wei Chen	
Electrochemical preparation of polyaniline doped with hydrochloric acid	446
Yulun Tao, Shun Yao, Leilei Hu	
The research of multi-information fusion in electrostatic monitoring for rolling bearing	452
Ruochen Liu, Shaoyi Bei	
Chapter 4: Energy and Environment Materials	
Application of BP neural network model in productivity prediction and evaluation of CBM wells fracturing	459
Gang Hu, Yunxiang Zhao, Ligu Wang, Teshe Li, Zhaoqing Tang, Dali Guo	
Preparation of high strength and low-cost glass ceramic foams with extremely high coal fly ash content	465
Qian Ma, Qingwei Wang, Lida Luo, Chaozhen Fan	
Workability and mechanical property of low grade pumping concrete modified by recycled coarse aggregate	471
Xiuhong Du, Wenhong Tao, Xinghua Fu, Mingle Liu	
Pollution and ecological risk assessment of heavy metal of Urban River sediment in Suzhou City	478
Haimin Su	
Synthesis and electrochemical performance of thiophene containing conjugated microporous polymerderived sulfur-doped porous carbon	484
Qingtang Zhang, Yan Meng, Qinqin Dai	
Automatic calibration of Ignition and Growth model for a DNAN based melt-cast explosive	488
Tongtang Cao, Lin Zhou, Xiangrong Zhang	
A CFD modeling investigation for structure optimization of a rotary steam tube dryer	494
Xuanyou Li, Ling Gao, Dongling Yun, Ligu Yang, Wenguang Geng, Jing Wu	

Synthesis of 2-(dinitromethylene)-1, 3-diazacyclopentane (DNDZ) catalyzed by magnesium ion	499
Pan Liu	
Study on the synthesis of anthranilicdiamides insecticide	503
Weiyan Qin	
Numerical study on the influence of human walking on contaminant transport indoors by using momentum theory method	506
Dongdong Cen, Zhuangbo Feng, Shi-Jie Cao	
Development of wearable equipment and piezoelectric vibration energy harvest devices	513
Shan Gao, Hongrui Ao, Hongyuan Jiang	
Research on the key techniques of the Miyun reservoir regulation and storage engineering's integrated scheduling	519
Yu Tian, Xiaolian Liu, Xiaohui Lei, Zhenhe Zheng, Zhao Zhang	
Research and analysis of the availability of nuclear power units during the design phase	525
Lifei Yang, Shuwen Wang	
Low cost management and operation of park green space based on design	532
Zhongcui Zhu	
Design of hydraulic control system for a new energy vehicle hybrid drive system	535
Chao Li	
Practice of group cooperative learning method	546
Zhongfang Li, Limin Shang, Changjian Zhai, Yana Shi, Haoyuan Yin, Yong Gao, Wanjia Zhang	
Analysis, treatment and countermeasures on oil spills at sea	550
Fuxin Li, Hongcang Dong, Mincang Liang	
Synthesis and characterization of Nano NiCo ₂ O ₄ by microwave promoted precipitation method	557
M Yang, A Chen, Y Zhang, L Le	
Analysis on impacts of domestic air source heat pumps to distribution networks in coal-to-electricity projects	563
Hua Shao, Luming Zhou, Jianpu Yuan, Bin Hou, Jiakun An, Kaiyuan Jin, Zhenwei Li, Wenliang Zhu, Jianhua Yang	

The study on the development countermeasure of renewable energy in provincial power grid based on SWOT.....	569
Jie Ma, Bo Zhang, Chunzheng Tian, Xiaoliang Jiang	
Design of unmanned airplane scheme (UAS) energy system	575
Yikang Lin	
Degradation of methyl orange using $\text{FeVO}_4: \text{Cu}^{2+}$ as photocatalyst.....	581
Q F Fei, C Wang, B H Yang	
Photocatalytic degradation of methylene blue by $\text{TiO}_2: \text{Fe}^{3+}$ supported by fly ash.....	587
C Wang, Q F Fei, B H Yang	
The removal of phosphate in rural domestic wastewater with a SBBR by micro-bubble technology.....	592
Ningqing Lv, Tongtong Li, Hui Liu, Yuanyuan Xie, Beidou Xi, Jinsheng Wang, Lei Wang, Ying Zhang	
Degradation of methylene blue in micro-bubbles activated sodium persulfate system	597
Lei Wang, Tongtong Li, Hui Liu, Ningqing Lv, Beidou Xi, Jinsheng Wang, Yuanyuan Xie, Ying Zhang	
The performance testing of new combinational air treatment system for underground projects	602
Hongyu Zhang, Chunlong Zhuang, Guangqin Huang, Jie Yu, Yajiao Liu, Xiaodong Shen	
The study on create transit metropolis promotion mechanism and model-Guiyang case	611
Jisheng Wang	
Application of ecological footprint in the construction of ecological campus.....	617
Yin Liu, Yang Liu, Yalan Guo, Zening Wei, Zhiao Ma	
Environmental factor analysis of green supply chain based on pricing decision.....	630
Ping Li	
Long-term trends in climate and hydrology in Jinghe River Basin	634
L H Meng, M F Zhang	
Numerical simulation of fluid flow and mixing process in a SCR denitration system.....	641
D Shang, B K Li	

Study on performances of heating system with solar hybrid air source heat pump in winter	647
Y Wang, W X Gao, W Y Zhou, L Yang, Q Wang	
Influence of dry anaerobic fermentation manure-straw ratio on volumetric biogas yield	654
Shuo Wang, Xiaohong Huang, Jihua Du, Zunxiang Li, Jing Jiao	
Studies on the aerogenesis effect of different proportioned straw and pig manure blend fermentation	658
Zunxiang Li, Xiaohong Huang, Jihua Du, Jing Jiao, Changjin Guo	
Technology and practice of rural sewage treatment based on unpowered biochemical project	664
Cheng Tong, Ying Li, Yuting Jiang, Jiaqiang Liu, Qiang Liu	
Sustainable ecological Hunhe river system design thinking	671
Weining Li, Hao Yuan, Zhihui Zhang	
The effect of different forms of additive carbon in small-scale synthetic food waste composting: An empirical study in a high school cafeteria	678
Yuchuan Ma	
Contribution analysis of recycled aluminum supply in China based on sustainable supply	687
Shaoli Liu	
Investigation of energy consumption and renewable energy resources in top ten countries with most energy consumption	693
N. Mejrizan Toosi, J.A. Esfahani, Mohammad Reza Safaei	
Chapter 5: Materials Processing and Genomic Engineering	
Reduction of shielding gas dosage in GMAW process	704
Hongjie Pei, Chengshi Liu, Linfeng Chen, Yuying Chen, Yufang Xu	
Numerical simulation on the influence of geometric size on the swell for traditional and gas-assisted extrusion of plastic micro-pipe	710
Zhong Ren, Xingyuan Huang	
Study on flow-induced crystallization behaviour of s-PVA/SWNTs dispersion	715
Xia Wang, Jun Sun, Lixing Dai	

Comparison of residual stress before and after shot peening on the surface of a Ti-6Al-4V titanium alloy by μ -X360n equipment	720
Bin Wang, Shengguan Qu	
Research on microstructure and solidification mechanism of Al-Ti-C-Ce mother alloy prepared by titanium hydride-petroleum coke	729
Yongdong He, Xiaoyu Yang, Feng Guo, Peng Li, Yuanqing Zhang, Yinli Dou	
Experimental research on surface roughness of milling medical magnesium alloy	736
Yang Qiao, Shouren Wang, Peiquan Guo, Xuefeng Yang, Yanan Wang	
Peroxidase properties of fresh-cut potato browning	743
Ling Li, Minming Wu, Rongfang Wang, Mei Guo, Tieling Liu	
Enzymatic properties on browning of fresh-cut potato	748
Ling Li, Minming Wu, Minmin Zhao, Mei Guo, Haixue Liu	
Recent advances in montmorillonite/alkylammonium	754
Jun Qiu, Guoqing Li, Ping Chen, Shan Jiang, Guifang Wang, Xianjun Lyu	
Torque waveform analysis and fastening method on invalid thread of track bolt	761
Jianjun Meng, Decang Li, Bowen Fan, Yatong Zhang	
Railway fastener image recognition method based on multi feature fusion	771
Ruxun Xu, Jinyue Han, Wenzhe Qi, Jianjun Meng, Hongqiang Zhang	
Experimental investigation on milling of hardened steel Cr12	779
Peiquan Guo, Yang Qiao, Li Zhao, Shouren Wang, Hongtang Chen	
Topology optimization of transmission system of flapping-wing micro aerial vehicle via 3D printing	787
Zuyong Chen, Jianghao Wu, Yanlai Zhang	
WLS optimal design for variable FIR filters with continuous parameter of fractional delay	794
Maowei Yin, Yanlong Wang, Zhongfu Ye	
Application of wavelet entropy and grey relational analysis in fault diagnosis of hydraulic system of engineering machinery	800
Youquan Wang, Dongkai Yang, Fanwen Meng	

A study of structural design of flapping rotary wing aircraft	808
Fan Yang, Qiang Pan, Tian He, Jianghao Wu, Yanlei Gao	
Using specific speed and standard basic parameters select single-stage and double-acting centrifugal pump	815
Xiaoming Zhu, Yonghai Yu, jingyuan Bai	
Sealing performance analysis of P –shape seal with fluid pressure penetration loading method	822
B Zhao, YJ Zhao, XY Wu, HC Xiong	
Study on quick detection method of external heat flux simulator for spacecraft	829
Zhe Wang, Yang Yu	
Chapter 6: Biomaterials and Healthcare	
Intelligent car housekeeper design based on brain waves	837
Xinguo Cui, Zhaoye Li, Yi Liu, Feilong Yu, Hongyue Sun	
Effect and mechanism of modified Dachengqi Decoction on gastrointestinal motility in dyspepsia mice	841
Xiaobing Li, Pengfei Qin, Yunping Bai, Yuanyuan Guan, Yang Gao, Juan Huang, Peng Han, Fuyang Li, Danyu Wang, Ke Wang, Yang Yang, Ronghui Zhang, Lingyun Cai, Xiaoqing Li	
Effect of gynostemma pentaphyllum on Spleen Qi deficiency mice	847
Xiaobing Li, Fan Yuan, Liuyan Zhang, Zhi Qiao, Pengfei Qin, Jingxiao Zhang, Yuping Hu, Aobuliaisan Aziguli, Xudong Yu, Donghui Ding	
Preparation and phenol adsorption property of tobacco stem based modified porous materials	853
L Zhang, T D Zhang, R Gao, Y L Zhao, W Zhang, D Y Tang, J Jiao, H Y Ma, J Y Yang	
Research on the evaluation indexes of animal model of liver-fire hypertension syndrome	861
Can Cui, Zhenzhen Lan, Xiaobing Li, Lihua Zhou	

Chapter 7: Mechanical Engineering

Research on influence of spinning process parameters based on simulation and experiment	866
Xueguang Li, Yongliang Wang, Wei Liang, Liqin Miao	
Finite element analysis of Bi-stable plates for piezoelectric energy harvesting	872
Lihua Chen, Tan Chen, Wei Zhang	
MoS ₂ nanostructure electrodeposited on Ni-P coating: an efficient and durable hybrid cathode catalyst in alkaline water electrolyses	880
Qingsong Hua, Zongmin Zhen, Xiangyun Qiu, Lili Zheng, Yongzhi Ma	
Ultrasonic nondestructive testing and regulation technology of residual stress	888
Jianfeng Song, Chunguang Xu, Zhixiang Li	
Research and simulation analysis of an Electric-Servo-Actuator system	895
Shuping Li, Zhongxing Yan	
The wear resistance of plasma cladding layers on the substrate Hardox450 of middle trough	802
Xiaobing Yang, Junxia Li	
Simulation analysis on cast-in place pile pouring	909
Lei Yu, Zhaolei Liu	
Research on reliability of scraper chain drive system	914
Qipeng Ma, Junxia Li	
Study on nonlinear impacting responses of the subway	921
Yiping Li	
Study on the comfort of high-speed train drivers in a windy environment	927
Hongyu Zhang, Jun Mao, Yaodong Sun, Yanhong Xi	
Vibration analysis and experimental research on metal rubber vibration isolation of vehicle steering wheel	934
Chongyang Zhang, Hongrui Ao, Hongyuan Jiang	
The effect of tear straps on compressive carrying capacity of composite omega single-stringers	939
C H Geng, R X Bai, Z K Lei, W Wu, X Z Zhang, K W Peng	

Application of primer and ultraviolet radiation in pressure sensitive adhesive tape.....	945
Bangyu Li, Yangyang Huang	
Multi-step hydroforming technology of aero-engine guide vane Liner	949
Shangwen Ruan, Lihui Lang	
Research on the architecture and physical end of Micro-grid CPS	955
Siyi Zhang	
The measuring method for actual total magnification of metallographic microscope — digital image method.....	961
Geping Bi, Xiaoyu Chen, Zhe Yang, Aijin Ma	
The numerical simulation of damage characteristics of the bridge under cruise missile attack	973
Qi Sun
